English – Full Professional Proficiency

German – Conversational Level

French – Native

ADDITIONAL

I am well-versed in Agile methodologies and common tools - Jira, Confluence, Figma, Notion, Slack, git, CircleCI, Github Actions..., and have experienced Scrum, Kanban, or often a tailored blend that best suited the team or external constraints. My educational background gives me a solid understanding of business requirements and product design, and I enjoy participating in product-related discussions. I am overall an easy-going person, looking for harmony in a team. Outside work, you can find me in nature, bouldering, drinking too much coffees or playing music.
